Summary

Ph.D. candidate at West Virginia University with research interest in developing deep learning algorithms, mainly focused on multi-modal biometric security and heterogeneous face recognition. Have an in-depth knowledge of python-based machine learning and deep learning frameworks such as Scikit-Learn, Tensorflow, and Pytorch. As a Ph.D student working on different projects has given me an ability to develop successful discriminative and information retrieval models for computer vision applications. Currently, I am working as a deep learning intern at Signify research in Cambridge, MA.

Highlights

- 3+ years experience of implementing algorithms using deep learning frameworks Pytorch, TensorFlow, Keras, and Caffe.
- 5+ years experience of working with Python, specifically in the field of machine learning.
- 3+ years experience in Web development using Asp.Net, C#.
- Excellent oral, written and communication skills
- Internship experience at Mitsubishi Research Lab (MERL) in Cambridge, MA.
- Reviewer for IEEE Transactions on Multimedia, IEEE GLOBECOM 2019, IEEE ICITSEE 2018
- Best poster awards at the Center for Identification Technology Research (CITeR) Spring 2019 and Fall 2019 meetings.

Work Experience

Deep Learning Intern

Cambridge,MA

Signify Research

June, 2020 - PRESENT

- Development and implementation of deep learning algorithm for object detection and semantic segmentation in the field of agriculture AI
- Develop and implement machine learning model for stress and disease detection in plants

Research Intern

Cambridge,MA

Mitsubishi Electric Research Lab (MERL)

Jan., 2020 - May, 2020

- Integration of recurrent neural network and belief propagation for developing error correcting decoder for wireless communication applications.
- Development of a deep learning based end to end wireless communication system.

Research Assistant

Morgantown,WV

West Virginia University

June 2015 - Dec. 2019

- Cloud-based biometric service: Design methods to perform biometric recognition in a smartphone environment using cloud-based services.
- Multimodal biometric security: Achieved high matching and security performance by integrating deep hashing with error-correcting codes (ECC) for multimodal biometric security.
- Facial image retrieval using soft biometrics query: Adopt deep cross-modal hashing and neural ECC decoding for a virtual facial line-up system using soft biometrics query (i.e.,facial attributes).
- Cross-resolution face recognition: Develop an attribute-guided coupled generative adversarial network (GAN) architecture for cross-resolution face recognition.

Software Developer

Hyderabad, India

Dolphin Talreja InfraPro Private Limited

Jan. 2014 - May 2015

- Developed a web tool that will help the company in account management, cost management, and labor management.
- Assisted in preparing an estimate for a new project for prospective clients.

Geospatial Database Software Developer

Morgantown, WV

West Virginia University Research Corporation

Jan. 2011 - Dec.. 2013

- Developed a Website portal to host multiple applications for West Virginia Division of Natural Resources using Asp.Net (C#), HTML, JS and Ajax.
- Created a user management system for the portal including login control, and maintain the user credentials and roles in a SQL Server database.
- Developed a 10-page data entry web form for one of the applications and link it to the SQL database.
- Maintained the applications and as an administrator provided access to the user based on individual privileges and roles.

Software Developer

Morgantown, WV

West Virginia University

Dec. 2009 - Aug. 2010

- Researched and constructed an automated marking system for marking and identifying lumber using RFID.
- Developed a Java and a .Net code for reading the data from serial port to a database using the scanner.

Software Intern

Canonsburg, PA

Ansys Inc.

May 2009 - Dec. 2009

- Development and maintenance of ANSYS Mechanical Software using C++.
- Contributed to writing strongly typed interfaces and objects for the engineering simulation data model.
- Used Microsoft component object model (COM) components for developing interfaces from the requirements by adding new methods.
- Implemented the new methods and ran regression tests to verify the correctness of these methods.
- Developed Unit Tests in C++ and C# to ensure software requirements are met.

Graduate Teaching Assistant & Mentor *Morgantown, WV*

West Virginia University *Aug. 2007 - May. 2009*

- Taught fundamentals of JAVA programming and conducted related programming labs.
- Mentored and guided undergraduate students in the concepts of C, C++, Advanced Mathematics, Physics, Chemistry, and Statistics.

Journals

- V. Talreja, M. C. Valenti, N. M. Nasrabadi, **"Deep Hashing for Secure Multimodal Biometrics"**, Accepted to be published in IEEE Transactions on Information Forensics and Security (TIFS)
- F. Taherkhani, V. Talreja, M. C. Valenti, N. M. Nasrabadi, **"Error-Corrected Margin-Based Deep Cross-Modal Hashing for Facial Image Retrieval"**, Accepted to be published in IEEE Transactions on Biometrics, Behavior, and Identity Science (T-BIOM)

Book Chapter

- V. Talreja, T. Ferrett, M. C. Valenti, and A. Ross, **"A Framework for Secure Selfie-Based Biometric Authentication in the Cloud"**, Selfie Biometrics.

Projects

- **Profile to Frontal Face Recognition in the Wild** Implemented a generative adversarial network (GAN) model for profile to frontal face recognition in the wild by projecting the profile faces and frontal faces into a common latent space for verification or retrieval [Sept. 2019-Dec. 2019]
- **Cross-resolution face recognition** Designed and implemented an embedding model for cross-resolution face recognition based on novel attribute-guided deep coupled learning framework using generative adversarial network (GAN). [Jan. 2019-Aug. 2019]
- **Deep virtual facial line-up using soft biometrics** Implemented a fast image retrieval system using deep cross-modal hashing and error correcting codes for quickly searching over a large gallery of faces based solely on a soft-biometric query (facial attributes). [April 2018-Dec. 2019]
- **Deep hashing for secure multimodal biometrics** Used the concepts of error-correcting codes and deep hashing to develop a multimodal biometric security framework for generating a secure multimodal template from each user's multiple biometrics. [March 2016-Dec., 2019]
- **Cloud-based biometric service model for iris and ocular recognition using a smartphone** Implemented a framework for Biometrics-as-a-Service (BaaS) that performs iris/ocular matching operations in the cloud, while using images captured with smartphones. [June-Nov. 2015]

Education

West Virginia University *Morgantown, West Virginia*

Ph.D. in Electrical Engineering (GPA:4.0/4.0) *June, 2015 - Present*

- Advisor: Matthew C. Valenti
- Co-Advisor: Nasser M. Nasrabadi

West Virginia University *Morgantown, West Virginia*

M.S. in Electrical Engineering (GPA:4.0/4.0) *August, 2007 - August, 2010*

- Advisor: Natalia Schmid

Osmania University *Hyderabad, India*

B.E. in Electronics and Communication Engineering (GPA:3.9/4.0) *November, 2001 - May, 2005*
